Dear Participants,
We are delighted to present "Kathopakathan," an enriching initiative brought to you by the Internal Quality Assurance Cell (IQAC) of Chakdah College. Our primary objective is to establish a platform for intellectual discourse and knowledge sharing. We cordially invite you to join us and be a part of this journey towards promoting enlightenment and facilitating knowledge exchange. Engage in stimulating conversations, constructive dialogues, and meaningful discourse that fosters intellectual growth and critical thinking. Thank you for being a part of this enriching journey towards knowledge and growth.

Warm regards,
Dr. Swagata Das Mohanta, Dr. Arun Kumar Nandi
Principal, Coordinator, IQAC,
Chakdah College Chakdah College

About the Topic
Human beings form an integral part of and are the most evolved species on planet Earth. Nature constitutes all, from minuscule microbes to the highly evolved humans, and conceives each, as one of its own. However, recent human interventions as well as activities have had negative impacts on nature to the point of reaching a juncture of 'denature'. This inevitably leads to the gradual jeopardization in terms of equilibrium, environment sustainability, biodiversity and species extinction among others. It is fair to denote, therefore, that nature has its share of repercussions, protesting against such malicious human conduct which, paradoxically, turns the tables of victimisation."

Dear Faculty and Staff,

You are cordially invited to our 3rd Kathopakathan Lecture on September 26, 2023, at 2:30 p.m. in the Vidyasagar Sabhakaksha, Chakdah College. Dr. Anjan Sengupta, Associate Professor of Botany, will deliver a captivating lecture on "As You Sow, So Shall You Reap." For your convenience, we will live-stream the event on the Chakdah College YouTube channel and Facebook page, allowing for broader participation. Our esteemed Principal, Dr. Swagata Das Mohanta, will inaugurate the session with a welcome address, ensuring an intellectually stimulating experience. The event will conclude with a gracious vote of thanks from Dr. Sarbajit Paul, Associate Professor of Commerce. Please arrive 15 minutes early for a prompt start. Let's also encourage our students and stakeholders to actively engage, nurturing a culture of curiosity and enlightenment. We look forward to your intellectually stimulating presence. Warm regards, Dr. Arun Kumar Nandi, Coordinator, IQAC, Chakdah College

10:09

H] Outcome of the seminar:

The Lecture entitled 'As You Sow, So Shall You Reap' has explored the human impact on nature and environmental sustainability and also critically analyzed the complex relationship between human activities and the natural environment. The programme has made awareness about how recurrent human interventions have disrupted the delicate balance of ecosystems, leading to issues such as biodiversity loss, environmental degradation, and species extinction. By examining the consequences of such actions, the initiative seeks to foster a deeper understanding of the concept of 'denature,' and how these practices have jeopardized long-term environmental sustainability. Participants also gained an idea on nature's resilience and its consequential responses to human exploitation, emphasizing the urgent need for more sustainable and ethical interactions with the natural world.

Upon completion of this programme, participants have gained a comprehensive understanding of the adverse effects of human activities on the environment. They are now able to identify key areas where human-induced disruptions have led to environmental crises, such as loss of biodiversity, habitat destruction, and climate change. Additionally, a deeper awareness has been developed regarding the concept of 'denature' and nature's inevitable reactions to continued exploitation, which in turn affect human society. By the end, participants are equipped with knowledge and strategies to promote environmental sustainability, advocate for responsible stewardship of natural resources, and contribute to mitigating the negative impacts of human activities on the planet.
