H. Outcome of the seminar:

The seminar was successfully organized by the Central Library, Chakdaha College. The eminent speaker delivered his lecture on "finding information sources – the open way". It was very fruitful for the audience, mainly the research fellow and teaching staff of different fields, as they came to know the way to acquire their desired information by using different browsing tools according to their needs. Members of the audience learnt to use different searching techniques to avoid noise during recall of information in the age of information explosion. He also indicated the way to save time to acquire valuable information by using different e-resource databases according to their needs.

All the members of the audience were satisfied and felt enriched by the seminar and they proposed to arrange this type of seminar in future to regenerate and accumulate knowledge about advanced resource searching methods in the electronic era for any academic institution.

Along with this a two day Book Exhibition was also arranged by the Library Sub- Committee, where State and National level publishers displayed their books. Students and faculty members

were really benefited by the exhibition; most of them purchased Sahkaka books for the library and personal use.
